

Population Projections

City of Kawartha Lakes & Haliburton County

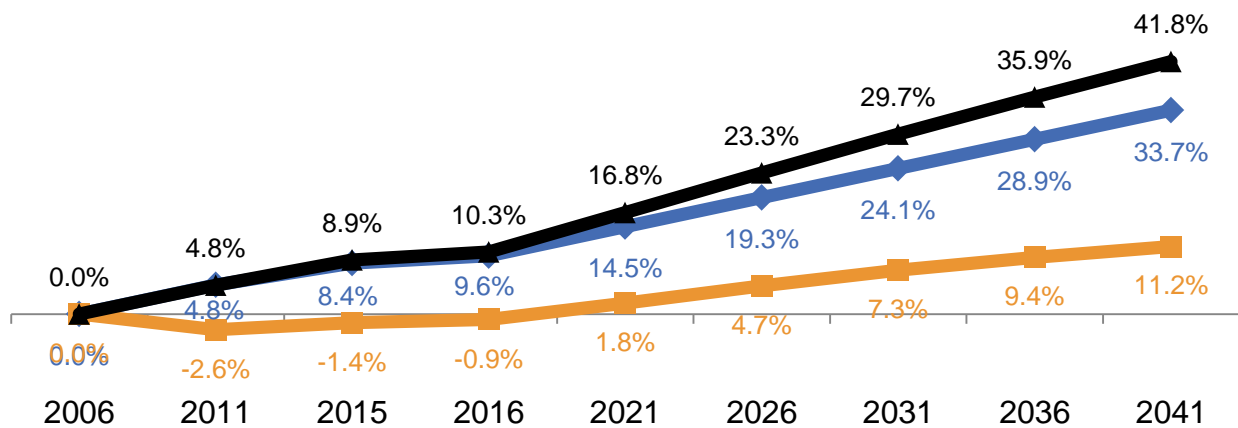

If the current trends persist we should expect that the population 40 and under will continue to shrink in the coming decades. Meanwhile the population older than 60 will continue to grow. Overall, the rate of population increase in both the City of Kawartha Lakes and the County of Haliburton is forecast to lag behind Ontario. This trend will continue only if the current conditions remain in place, it does not mean that these conditions cannot change.
